

Luis Miguel Gonzalez

Front-End Developer

West Hills, Los Angeles, CA • (747) 295-3324 • lmiguelgrubio@gmail.com • [Portfolio](#)

SUMMARY

Front-end developer who builds responsive web applications, client websites, and cross-platform desktop tools with React and TypeScript. Comfortable across the front-end stack, component architecture, state management, and clean, accessible UI, and equally at home automating workflows with scripting. Bilingual in English and Spanish; currently completing a B.S. in Software Engineering.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, SQL, PowerShell, Bash

Frameworks & Libraries: React, Electron, Node.js, Tailwind CSS

PROFESSIONAL EXPERIENCE

Front-End Developer

2024 – Present

International Computer Support (ICS, Inc.) — Tarzana, CA

- Designed and developed responsive client websites end-to-end in React and TypeScript, including builds for Security solutions, Q-Metrx, RRC and Gordon & Associates, owning layout, styling, content structure, and deployment.
- Built and maintained the company's web presence, translating business requirements into clean, maintainable component-based front ends.
- Developed internal web applications and a cross-platform desktop tool (ScripThink) with React, TypeScript, and Electron, featuring a drag-to-reorder visual builder and reusable UI components backed by SQLite and IPC.
- Engineered PowerShell automation scripts that reduced workstation provisioning time by 50%.
- Bridged development and systems work, supporting IT operations across 50+ clients while sustaining 99%+ uptime.
