

LUIS MIGUEL GONZALEZ

IT Manager | Cloud & Infrastructure Modernization | AI-Driven Automation

(747) 295-3324 | lmiguelgrubio@gmail.com | Los Angeles, CA | Bilingual: English & Spanish

PROFESSIONAL SUMMARY

Forward-thinking IT Manager with 6+ years of progressive experience leading IT operations, cloud infrastructure, and digital transformation initiatives. Proven ability to bridge business operations with modern technology capabilities, including Microsoft Azure cloud environments, AI-powered automation, process integration, and data-driven decision-making. Experienced in managing help desk operations, enterprise system administration, and cross-functional technology projects from planning through delivery. Skilled in scripting and intelligent automation to streamline workflows, reduce manual processes, and improve operational efficiency. Hands-on expertise in network architecture, firewalls, and hybrid cloud security. Bilingual (English/Spanish) leader committed to mentoring IT teams and translating technical concepts into measurable business value.

CORE COMPETENCIES

Cloud & Modernization: Microsoft Azure (Entra ID, Azure AD, hybrid identity, cloud migration planning), cloud-enabled infrastructure, Microsoft 365 administration, hybrid on-prem/cloud environments, infrastructure modernization roadmaps

AI & Automation: AI-driven process automation, PowerShell & Bash scripting for intelligent workflows, task scheduling and orchestration, automated provisioning and deployment pipelines, evaluating AI/ML tools for business process improvement

Data & Analytics: Power BI reporting and dashboards, data-driven decision-making frameworks, system log analysis, performance monitoring and KPI tracking, Firebase/Firestore real-time data integration

Infrastructure & Networking: Windows Server (2012/2016/2019/2022/2025), Active Directory, DNS, DHCP, Group Policy, VPN, firewalls, routers, switches, network architecture, TCP/IP, VLANs, bare-metal provisioning, system imaging

Enterprise Systems: Microsoft Exchange, Google Workspace, system integrations, web application development (HTML/CSS/JS/Node.js), API integrations, Firebase/Firestore, ticketing systems, vendor management

Hardware: Custom server & workstation builds, Dell/HP enterprise hardware, laptop & mobile device repair, cabling & switch installation, ATM/kiosk hardware diagnostics

Leadership & Communication: IT team leadership & mentoring, project management & milestone tracking, cross-functional stakeholder collaboration, process documentation & improvement, translating technical concepts into business value, bilingual (English/Spanish)

PROFESSIONAL EXPERIENCE

IT Manager / Lead IT Technician

March 2022 – Present

International Computer Support (ICS, Inc.) | Tarzana, CA

- Oversee daily IT operations including help desk services, system monitoring, incident resolution, and escalation management, ensuring reliable service delivery across the organization.
- Administer Microsoft Azure and Entra ID (Azure AD) for hybrid cloud identity management, driving the transition from fully on-premises infrastructure toward cloud-enabled services and hybrid environments.
- Design and implement intelligent automation workflows using PowerShell and Bash scripting, automating workstation provisioning, software deployment, and recurring maintenance tasks — reducing provisioning time by over 50%.

- Evaluate and integrate AI-powered tools and automation platforms to streamline IT operations, improve system monitoring, and identify opportunities for business process optimization across departments.
- Manage and track IT projects end-to-end, coordinating timelines, milestones, and deliverables while partnering with leadership to align technology initiatives with business objectives.
- Lead, mentor, and develop junior IT staff, establishing standard operating procedures and fostering a collaborative, high-performance team environment. Assume full operational leadership during management absences.
- Configure and maintain enterprise network infrastructure including firewalls, VPN tunnels, routers, and switches, ensuring secure, high-availability connectivity for on-site and remote users.
- Administer Active Directory, DNS, DHCP, Group Policy, Microsoft Exchange, and Google Workspace environments, enforcing MFA policies and security baselines across all endpoints.
- Develop web applications and system integrations using JavaScript, Node.js, Firebase/Firestore or Azure, connecting business platforms and enabling real-time data flows between systems.
- Build and deploy custom servers and workstations through bare-metal provisioning, OS imaging, and system hardening, supporting diverse operational requirements.
- Collaborate with vendors for procurement, support escalations, and technology evaluations, ensuring cost-effective solutions that align with the organization's modernization roadmap.

Field Technician / ATM Technician

Jan 2020 – Feb 2022

Nautilus Hyosung America | Los Angeles, CA

- Managed an independent service territory across the Los Angeles region, diagnosing, repairing, and maintaining Windows-based ATM and TCR (Teller Cash Recycler) systems at bank branches and retail locations.
- Performed OS reloads, firmware updates, and software deployments on enterprise kiosk systems using standardized USB deployment builds, ensuring machines returned to service within SLA targets.
- Monitored system logs and diagnostic data to identify recurring hardware/software issues, applying root-cause analysis to reduce repeat service calls and improve system uptime.
- Managed parts logistics, inventory tracking, and asset accountability, coordinating pickup, replacement, and return shipping workflows across multiple locations.
- Completed ongoing manufacturer training and certification programs on evolving hardware and software platforms, demonstrating commitment to continuous technical development.

IT Support Specialist

Jan 2018 – Dec 2019

Intercomen | Los Angeles, CA

- Provided desktop support, system configuration, and troubleshooting for end users across Windows and macOS platforms in a fast-paced environment.
- Assisted with network infrastructure setup, user account management, hardware procurement, and documentation of IT processes and procedures.
